Revised Swedish GDP in September 2019

In September 2019, the time series for the Gross Domestic Product (GDP) and other key measures in the National Accounts will be revised due to a benchmark revision.

The level of annual GDP increases preliminary by 1 percent 2015

The National Accounts (NA) carries out a benchmark revision every five years concerning annual input sources, methods and calculation models in a number of areas. The result of the most recent review leads preliminarily to 1 percent increase in the level of GDP for the year 2015. On 13 September updated time series will be disseminated for the years 1993-2017 and for the quarters 1993q1-2019q2. Time series for the period before 1993 will be disseminated later. The result of the review leads preliminarily to a rise in the GDP level and to a change in the composition of GDP.

Impact on GDP level 2015 *Preliminary impact on level in current prices*

GDP	+1 %
Output	+4 %
Intermediate consumption	+6 %
Household consumption	+3 %
Government consumption	+1 %
Gross fixed capital formation	+2 %
Export	-2 %
Import	0 %
