

PxWebApi 2.0 and PxWeb 2.0 from a technical point-of-view

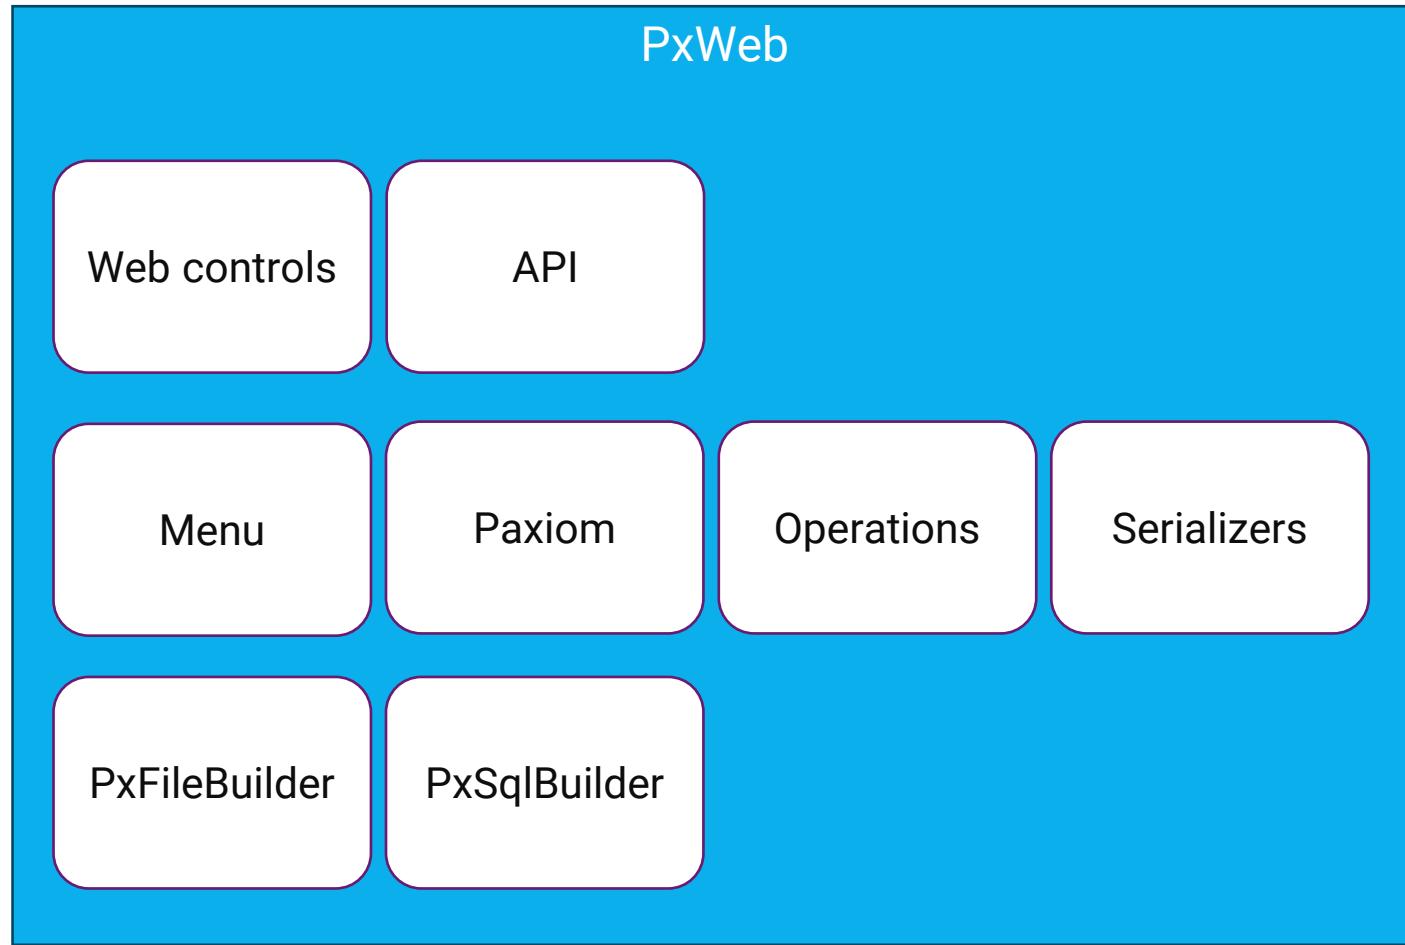

Petros Likidis and Kent Mossbäck
Statistics Sweden

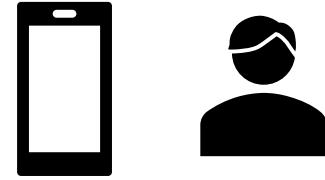

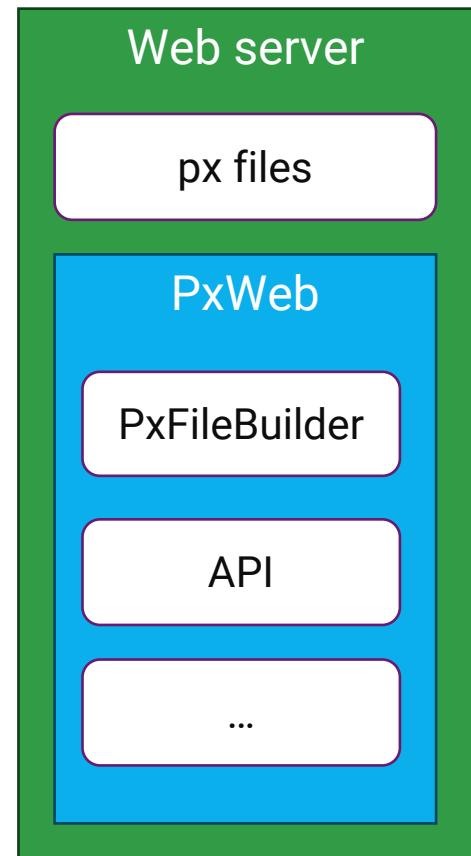

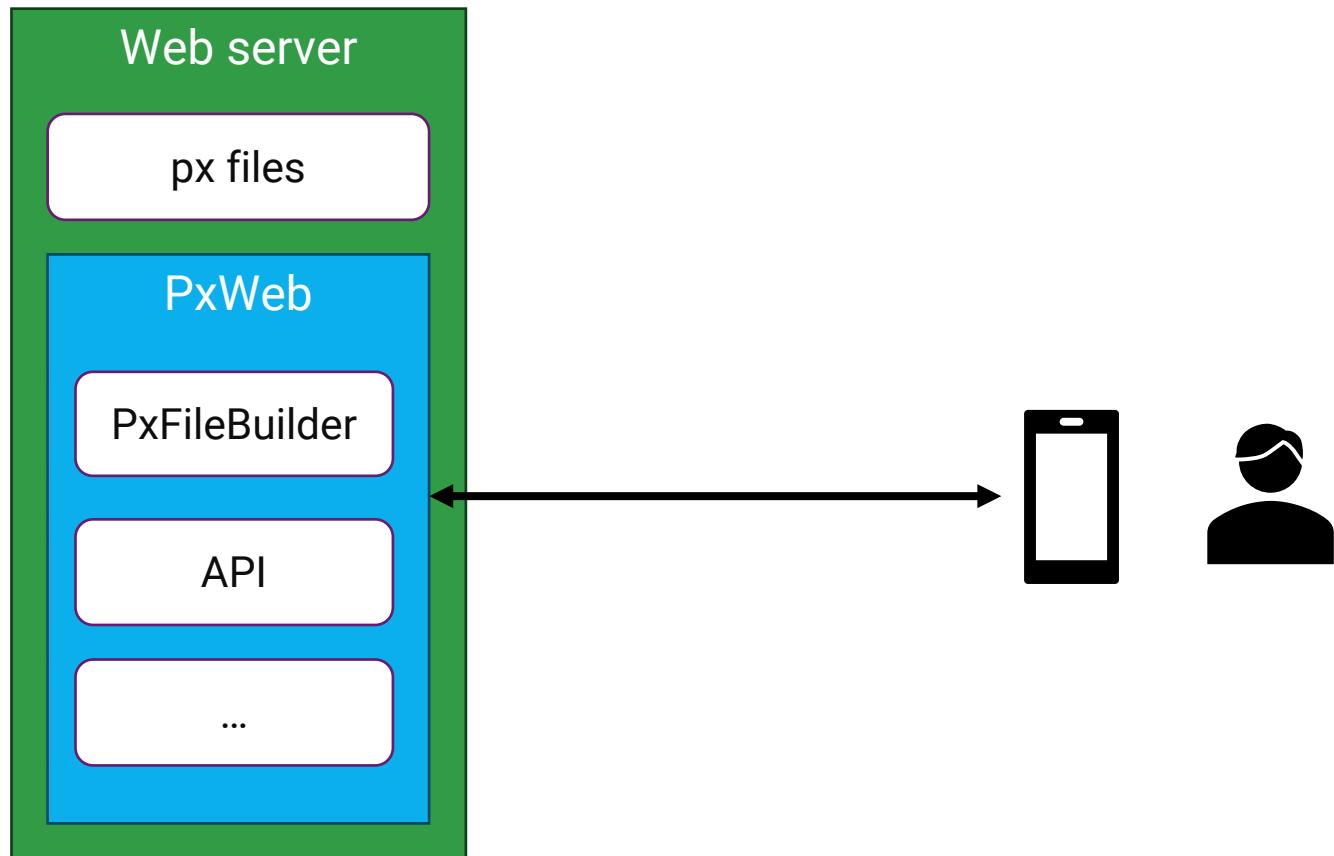

PxWeb today

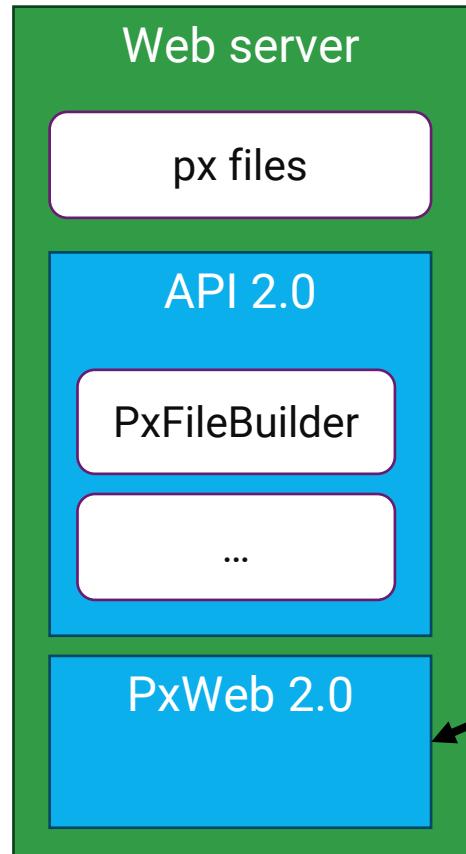

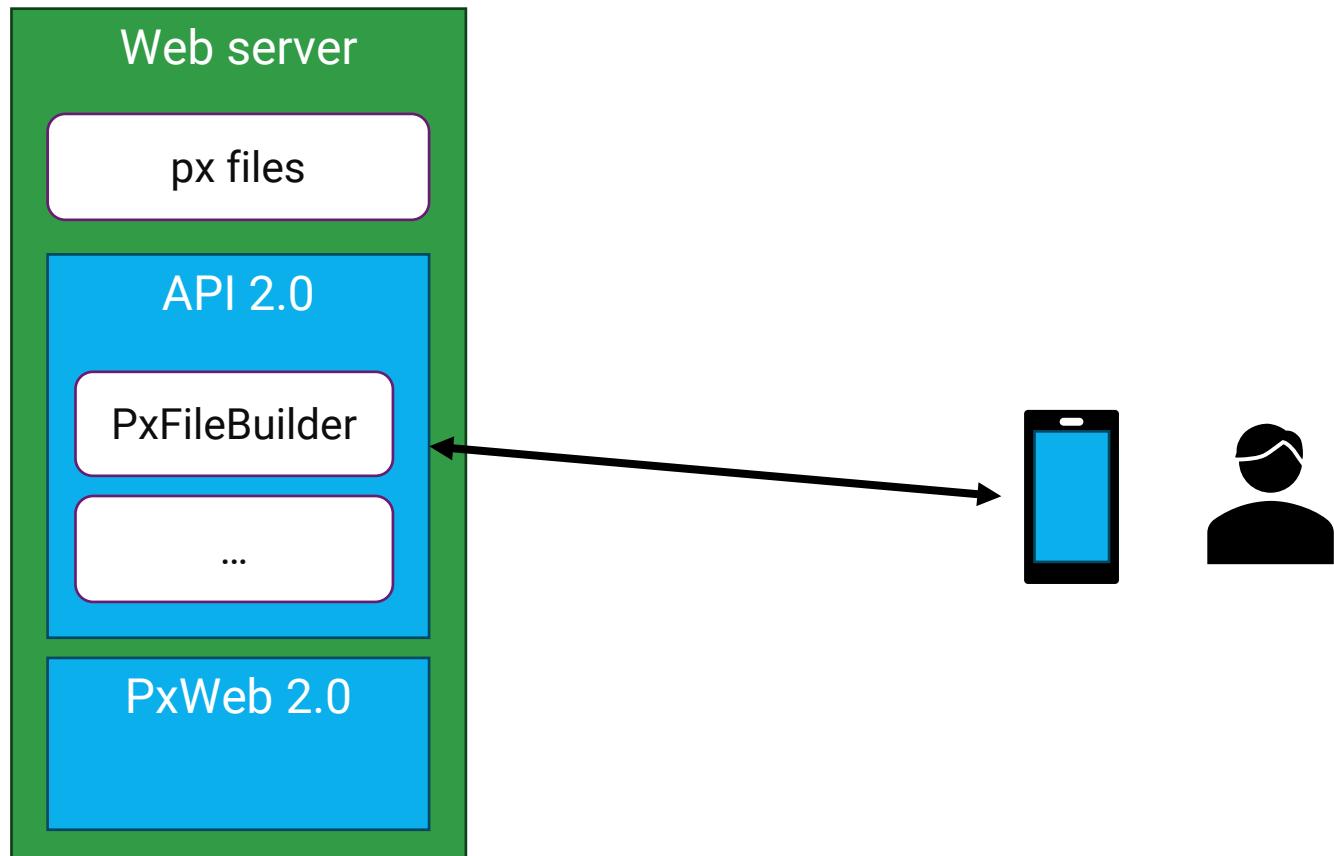

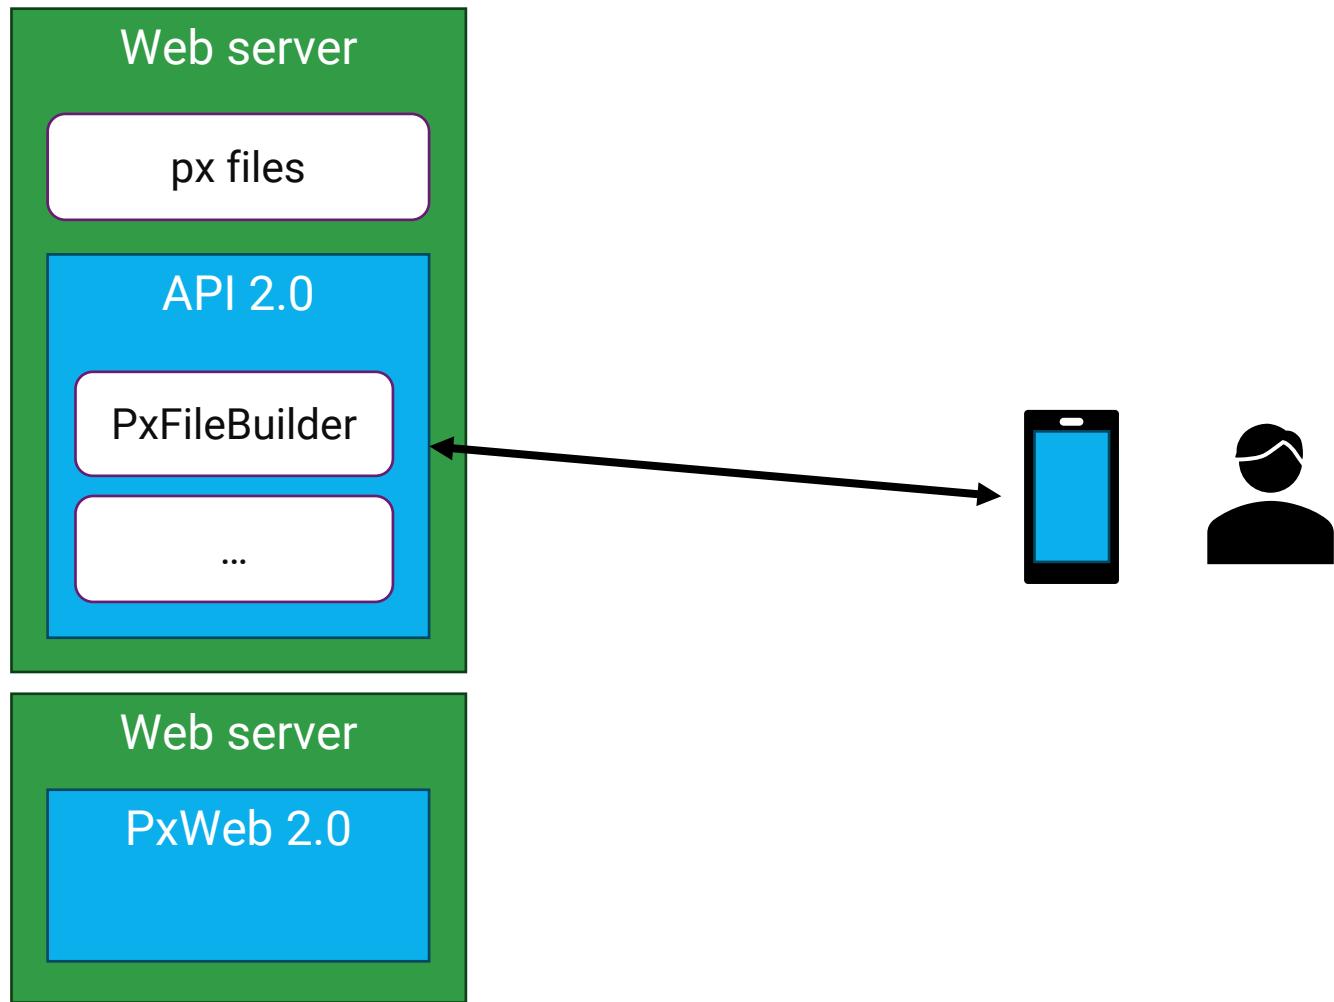

PxWeb 2.0

SCB

Changes in the PxWebApi 2.0

Changes in the API - Overview

- Default selection
- Table metadata drop px-json
- Operations
- Saved queries
- Output formats

Operations planed to be added in the API

- Pivot
- Sum
- Change value order
- *Change code/text presentation
- (Change text on values)

Operations that did not make the first cut

- Percentage
- Split time
- Delete value
- Delete variable

Operation expressions

- **SUM(NEW_CODE, NEW_LABEL,
COMMA_SEPARATED_LIST_OF_CODES)** – A new value is created with the code NEW_CODE and label/text of NEW_LABEL the data of the new value is the sum of values listed in COMMA_SEPARATED_LIST_OF_CODES. COMMA_SEPARATED_LIST_OF_CODES must have at least two value codes.
- **RECODE(OLD_CODE, NEW_CODE, NEW_label)**
 - Renames and/or recodes the value with code OLD_CODE to NEW_CODE, NEW_LABEL

Value order

- The order in the selection expression is the order of the values in the result.

Pivot

- New optional parameters to data endpoint
 - Stub
 - Heading
- If only one is given the rest of the unspecified variables are located on the opposite location.

Saved queries

- More in sync with what you can do in the API
- New format
- Serve as default selection instead of the algorithm
- Old saved queries

Migration application

- 98 % of Statistics Sweden's Saved queries can be migrated. Even higher percentage if Statistics Norway and Statistics Finland.
- Migrate old saved queries to new place and format.
- Run once or continuously

New API endpoints for saved queries

- New endpoints for saved queries for
 - Creating
 - Viewing
 - Running

Output formats

- Split the format into 2 variables
 - Format
 - Control parameters for the format
- Make it easier for the users with good defaults
- json-stat is dropped in favor for json-stat2
- Recommended and optional

xlsx	px
xlsx_doublecolumn	csv
csv	json-stat2
csv_tab	parquet
csv_tabhead	html
csv_comma	xlsx
csv_commahead	px-json
csv_space	
csv_spacehead	
csv_semicolon	
csv_semicolonhead	
csv2	
csv3	
json	
json-stat	
json-stat2	
parquet	
html5_table	
relational_table
