Release notes PxWeb 2025 v1 .....	1
What is new in PxWeb 2025 v1? .....	3
Bulk files.....	4
Bulk link.....	4
Known issues.....	4

## What is new in PxWeb 2025 v1?

Here are some of the new features in PxWeb 2025 v1:

- New admin endpoint that can extract all tables to zipped CSV files that can be used for bulk download .
- Bulk link feature with UI and admin setting support
- Bug fix: Hide port number in the URL to the API and saved query when port is 80 or 443. #649
- Bug fix: for ApiV2 to generate content element in querylink when remove singlecontent is set to true
- Bug fix: for special characters in the ApiV2 url, issue #663

This document is a description of the features and bug fixes introduced with PxWeb 2025 v1.

A number of bug fixes and improvements has been made. The (#xxx) numbers represents the related issues that has been reported on Github:

<https://github.com/statisticssweden/PxWeb/issues>

An online demo of PxWeb 2025 v1 can be found at:

<http://pxwebdemo.scb.se/>

More information about PxWeb can be found at:

<https://www.scb.se/en/px-web/>

## Bulk files

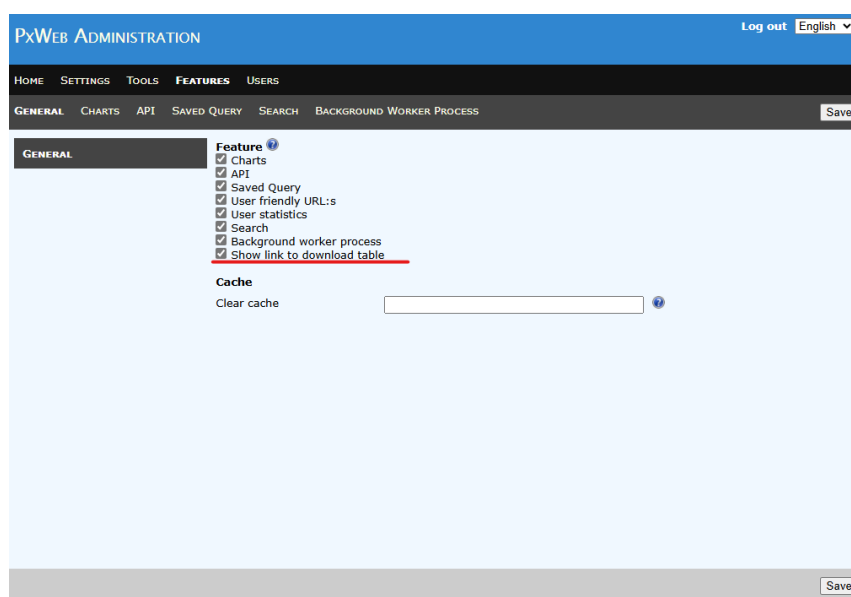

Possibility to extract all data points for tables to zipped CSV files for all configured languages in a database using the admin api:

```
/api/admin/v1/bulk?database=[database]
```

The name of the file is the name of the table. The files are placed on a share. An index.html file shows a list of the created files.

## Bulk link

It is possible to configure the display of a link to a bulk file. This is done in the admin interface. The link is displayed at the table level and points to the zip file if it exists. If the file is missing, no link is displayed.

## Known issues

There are some known issues regarding PxWeb. You can read about these issues on github:

<https://github.com/statisticssweden/PxWeb/issues>

This is also the place where you report PxWeb bugs and problems.
